

BHUPESH SURYAWANSHI

Full-Stack Developer | Java, Spring Boot & React.js

Pune, Maharashtra | +91 6354962174 | suryawanshibhupesh4@gmail.com | github.com/bhupesh04 | linkedin.com/in/bhupesh-suryawanshi15 | bhupesh04.github.io

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science & Engineering graduate (B.E., GTU 2026) with end-to-end experience across Java, Spring Boot, microservices, and React.js. Built a production-pattern microservices application with a React.js frontend, JWT authentication, RBAC, and a Spring Cloud Gateway routing layer. Delivered a separate full-stack e-commerce platform with a responsive UI, ORM-backed MySQL schema, and automated document generation. Comfortable owning a feature from database schema to rendered UI. Immediately available to contribute from Day 1.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), JavaScript (ES6+), SQL, HTML5, CSS3, C

Frontend: React.js, Hooks-based State Management, JSP, Bootstrap 5, Responsive Design

Backend: Spring Boot, Spring Security, Spring Cloud Gateway, Spring MVC, Microservices, JWT, REST API Development, JPA/Hibernate, JDBC

Java Concepts: OOP, Streams API, Functional Interfaces, Optional<T>, Collections Framework, Multithreading, @Async/CompletableFuture, Custom Annotations, Exception Handling, Design Patterns

Database: MySQL — Schema Design, Normalization (3NF), Query Optimization, JdbcTemplate, CRUD Operations

Architecture: Microservices, MVC, RESTful Design, Strategy Pattern, Factory Pattern, RBAC, System Design

Tools & Platforms: Git, GitHub, Postman, IntelliJ IDEA, VS Code

CS Fundamentals: DBMS, Operating Systems, Data Structures & Algorithms, Software Engineering, SDLC, Network Security, Agile

PROJECTS

PrepMate — *Community-Driven Technical Interview Question Bank (Microservices)*

Java · Spring Boot · Spring Security · JWT · JPA/Hibernate · Microservices · REST APIs · MySQL · React.js · Spring Cloud Gateway

- Delivered a full-stack microservices application end-to-end: a React.js frontend using functional components and Hooks-based state management, built with Bootstrap 5 and integrated with the backend through a Spring Cloud Gateway (port 8080) handling JWT validation, CORS, and request routing across all downstream services.
- Architected the backend with 4 independent Spring Boot services (Auth, Question, Vote, API Gateway) communicating via REST APIs, each backed by its own isolated MySQL database, with JWT-based stateless authentication and Role-Based Access Control (RBAC) enforced via Spring Security across all services.
- Implemented the Strategy Design Pattern for vote handling (UpvoteStrategy / DownvoteStrategy via VoteStrategyFactory) with two-layer duplicate vote prevention (application-level DuplicateVoteException plus a database-level UNIQUE KEY constraint), and used optimistic locking via @Version to guarantee safe concurrent vote updates.
- Applied 10+ Advanced Java concepts in production code — Streams API, Functional Interfaces (Predicate, Function, Consumer, Supplier), Optional<T>, Collections Framework (HashMap, TreeMap, EnumMap), @Async with ThreadPoolTaskExecutor, CompletableFuture<T>, custom annotations (@ValidDifficulty, @CurrentUser), and JdbcTemplate alongside JPA for native SQL aggregation.

ShopMate — *Full-Stack E-Commerce Platform*

Java · Spring Boot · Spring MVC · JPA/Hibernate · MySQL · JSP · Bootstrap 5 · iText 7

- Delivered a full-stack e-commerce application end-to-end using Spring Boot MVC with 4 core modules — Customer, Product, Order, and Admin — and built a fully responsive JSP/Bootstrap 5 UI ensuring cross-device compatibility across desktop, tablet, and mobile.
- Designed a normalized MySQL schema and integrated JPA/Hibernate ORM for persistent data management, supporting a complete order lifecycle across 4 states: cart → checkout → order placed → fulfilled, with role-based access control and a KPI dashboard for administrators.
- Implemented automated PDF invoice generation using iText 7 and applied the MVC design pattern with layered architecture (Controller–Service–Repository), enabling clean separation of concerns and a scalable, maintainable codebase.

EDUCATION

B.E. in Computer Science & Engineering — *S N Patel Institute of Technology, GTU, Bardoli* 2022 – 2026

HSC (Science) — *BABS Highschool, GSEB*

2021 – 2022

CERTIFICATIONS & LEADERSHIP

- Deloitte Data Analytics Virtual Experience (Forage) | Generative AI Mastermind — Oustskill | Web Development Workshop — GDSC
- Coordinator, TechnoKruti TK24 (State-Level Techfest): logistics, volunteer coordination & scheduling for 1500+ participants.
